2014 - 2015 Standardized Test Scores

While important, standardized test scores are not the only measure of a school's quality. These tests are designed to assess an individual student's performance compared to all students nationally. They do not compare a school's quality to other schools. Many other factors should affect your decision about which school your child should attend, including: spiritual influence, educational philosophy, curriculum quality, class size, location, cost, discipline policy, opportunities for parental involvement and communications.

In 2014-15, GGCA students took the following standardized tests:

Stanford 10: Taken by all 2nd through 10th grade students in the Spring.

PSAT: Taken by all 11th grade students in the Fall (Not included in this report).

Stanford 10 Scores

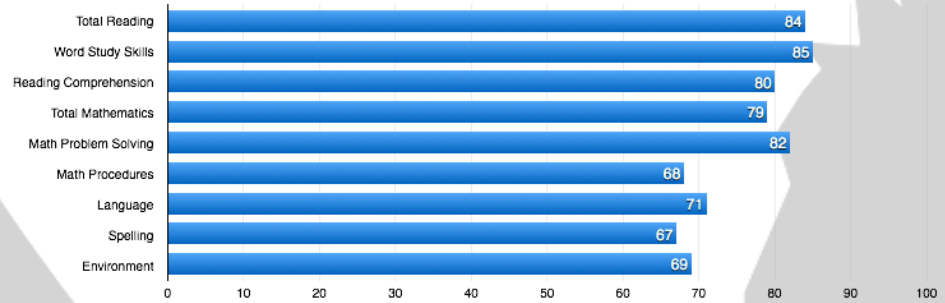

The Tenth Edition of the Stanford Achievement Test is traditionally given to all students in grades 3 through 8 every Spring. This year (2014-15) we also tested our 9th and 10th grade students to allow us to continue to measure progress, especially in light of how the testing landscape is changing nationally. The Stanford test measures students' performance in reading, language arts, and mathematics for each grade, as well as spelling, science and social science for most of the grades. All of the items on the Stanford 10 evaluate either *Basic Understanding* or *Thinking Skills*. Scores on the Stanford 10 are calculated using national norms. This means that students' scores are compared to the scores of all students nationally who took the same exam. GGCA has been using 2002 norms in order to compare year-over-year progress for each student. The national average, regardless of grade, is the 50th percentile.

Questions regarding standardized testing can be addressed to GGCA Administration. Please contact the school office at 410-485-0700 or email nmcfarland@ggca.org.

2nd Grade

Grade 2

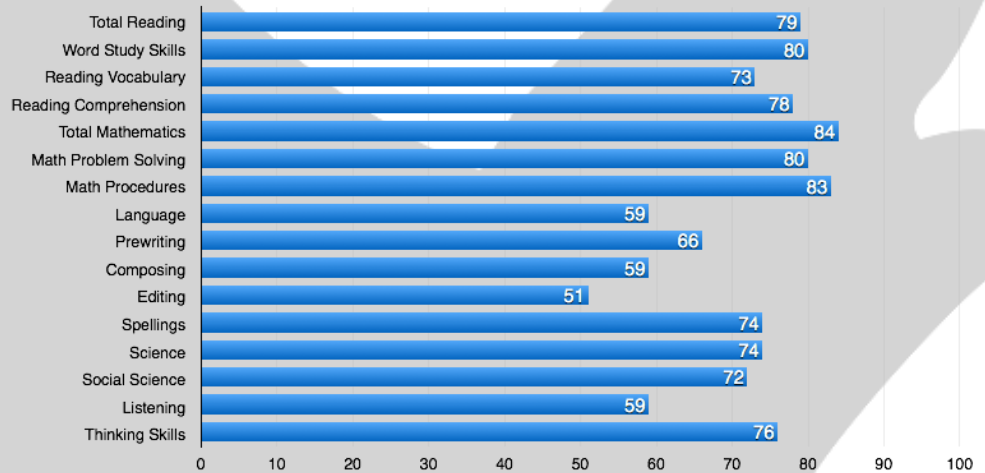

Subject	National Percentile
Total Reading	84
